

Flexible document management

DOWNLOAD MULTIPLE ATTACHMENTS

Allows for segmentation and export of attachments

ADD-IN DESCRIPTION

You can use Oracle Service Cloud to store all kinds of email attachments, contact documents, photo's, contracts, on incident, contact and organization level.

When you want to download multiple attachment of, for example, a set of incidents of contacts, you have to download them one by one.

This add-in allows you to easily select the documents you need.

Define your own document segments and export your selection with a single mouse click, structured just like you want it to be.

WHAT WE DO

As an Oracle Service Cloud Gold partner, WeSquare implements Oracle Service Cloud add-ins, custom processes and integrations that have proved to enhance results among our clients over the last few years.

Despite integrating specific OSC customizations, WeSquare add-ins can be licensed off the shelf without basic costs for building and testing.

INTERESTED?

Please get in touch to extent the basic document management functionality of Oracle Service Cloud. WeSquare can deliver quick and supports your solution in the future, depending on what you require.

“Implementing and improving Oracle Service Cloud solutions is what we do best, in a cost effective manner.”
